On Learning, Teaching, and Flying

Hello and Welcome!

an overview of this blog

My name is John O'Leary — although everyone calls me Jack. Nice to meet you!

I also go by ~~You may also know me as~~ Jules Altis. ~~I use that screen name~~ for live streams or online community ~~interactions~~ *yes other* (such as planning Microsoft Flight Sim fly-ins).

My (smart, beautiful, and ~~usually correct~~) *supportive* wife suggested using *in this* the first blog post ~~should~~ set up the blog. *fly*

Jack O'Leary

A pilot and a lover of learning

She's ~~probably correct~~, *usually right*
~~and so this first post is~~
~~a bit meta.~~ *let's do that.*

This blog ~~covers~~ *is meant to cover*
~~topics across~~ learning, *my three greatest passions.*
teaching, and flying.

~~My goal is for~~ each *I'll try to make*
post ~~to~~:

- Be self-contained,
  in that you don't
  need to read other
  posts to ~~get the~~ *understand the*
  ~~value~~. *current one.*
- Have a subtitle
  ~~that concisely~~ and
  ~~correctly~~ *cy of*
  summari~~z~~es the
  topic, so you can
  decide if you'd like
  to read it.
- Include at least
  one meaningful
  application for
  everyday life. Not
  just having a
  takeaway, ~~but~~
  some plausibly
  useful idea that
  you could turn

around and apply.

- Connect to other ideas or domains where possible. I strongly believe in Charlie Munger's Latticework of Mental Models, and hope fitting ideas into a broader context will make the knowledge more useful.

*[handwritten margin notes: "move to footnote"; edits: "*ing*" above "hope", "*e*" change, strikethrough "will", "*e*" on "make"]*

- Iteratively improve over previous posts — whether in writing, formatting, content, or something else. (To that end, please reach out through a comment below or a message from the "Contact" page if you have suggestions!)

[handwritten margin notes: "footnote"; "from"; "add link"]

For this post's plausibly useful idea:

Learning, Teaching, and Flying is an example of the rule of three:

> *a writing principle that suggests that a trio of events or characters is more humorous, satisfying, or effective than other numbers. The audience of this form of text is also thereby more likely to remember the information conveyed because having three entities combines both brevity and rhythm with having the smallest amount of information to create a*

pattern.

Until next time!
Jack
